PARTNERS

UNIVERSITÀ DEGLI STUDI FIRENZE

UNIVERSITY OF PATRAS

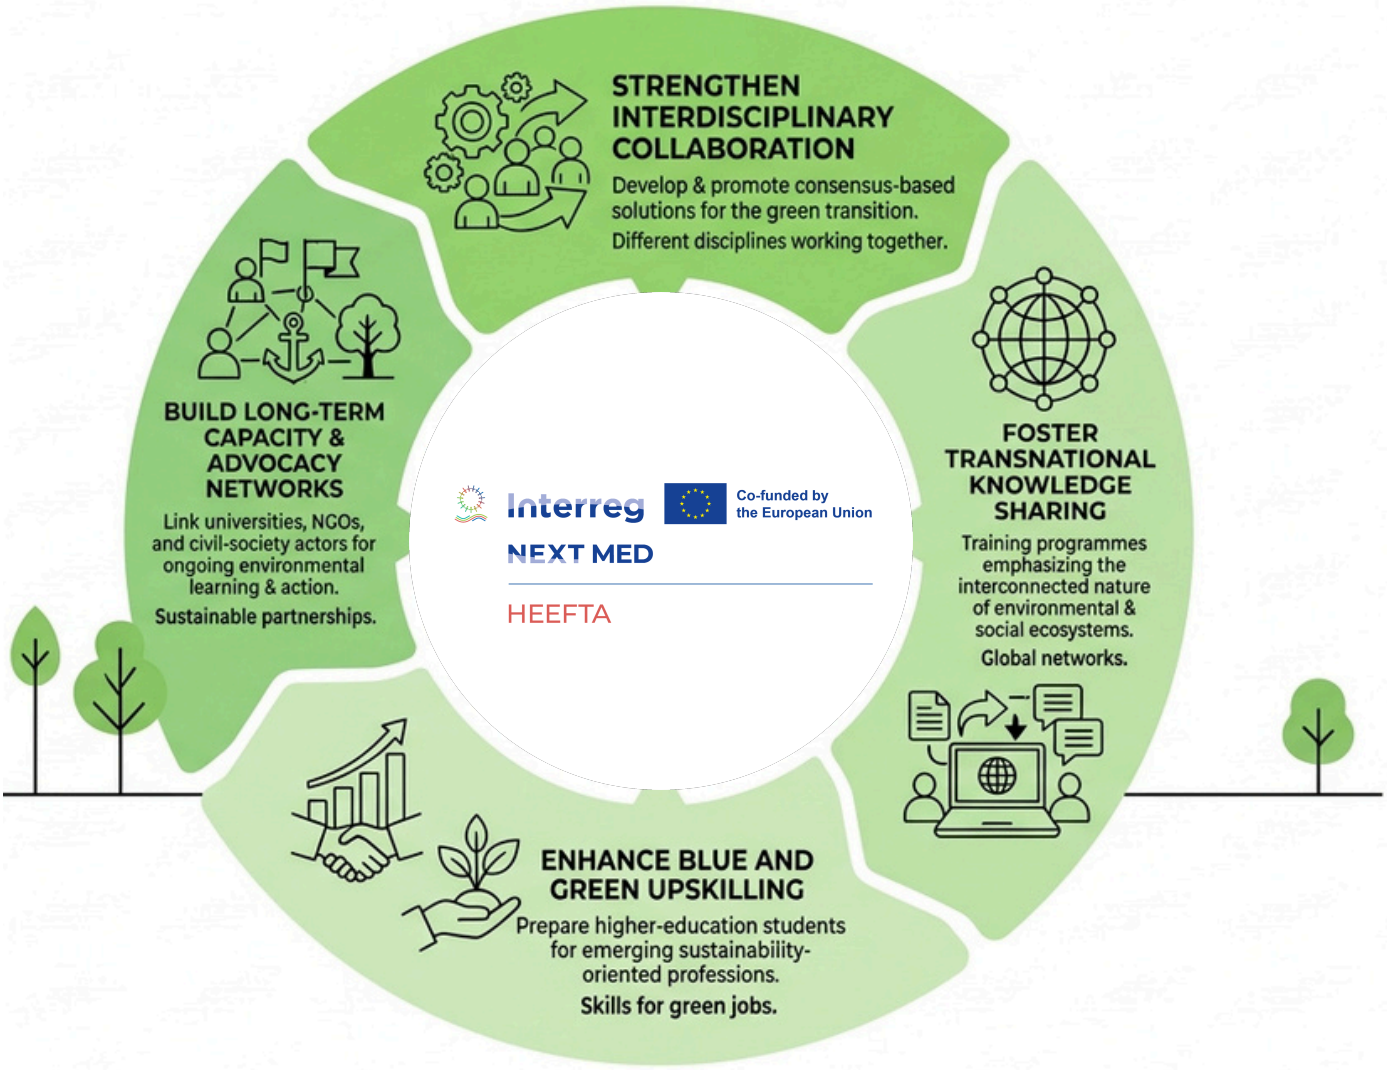

EGET VAKFI

MISSION

Promoting holistic and interdisciplinary environmental education across the Mediterranean to connect people, planet, and prosperity

VISION

To transform environmental understanding and action through interdisciplinary education, research collaboration, and advocacy

HEEFTA
Memorandum of Understanding (MoU)

1

Holistic and Interdisciplinary Education

Moving away from fragmented disciplinary approaches by integrating natural sciences, social sciences, humanities, engineering, agriculture, public health, and creative disciplines to address complex socio-ecological challenges

2

Environmental Humanities (EH) & Blue Humanities (BH)

Cross-cutting perspectives to weave ethical, cultural, historical, and aquatic dimensions directly into curriculum development and policy dialogue rather than relying solely on technical or scientific facts

3

Blue and Green Competences for Sustainable Transitions

Equipping higher education students and future professionals with practical blue and green skills, spanning marine governance, water resources, circular economy, renewable energy, and sustainable food systems, to meet contemporary labor market demands

4

Participatory Governance and Stakeholder Engagement

Collaborative decision-making and active involvement across every project stage, bringing together higher education institutions, students, researchers, public authorities, civil society organizations, and industry stakeholders

5

Long-Term Legacy and the HEEFTA Network

The partnership is designed to foster a sustained Mediterranean community of practice through open educational resources, institutional learning, and ongoing regional collaboration
